

High volume retail

Integrated Ingenico Lane3000

Ready for the next in high volume retail

Easing your everyday business

High volume retail requires easier consumer interaction and easier backoffice processes, and the Lane3000 delivers on both. The new Nets user interface sets the standard on clarity and simplicity, and our self service portal allows central control of your installed base.

Lane3000 supports contactless and mobile payments, and has a compact design that suits any counter. All Nets' advanced value added services, such as e-receipts, card based identification, gift cards, tourist cards and instore invoicing are supported.

Several integration alternatives

Lane3000 supports leading ECR systems, including cloud based setups. With a single integration you can install in the entire Nordic region with all currencies, languages, certifications and banks covered.
