choice

Integrated Ingenico Lane5000

Premium terminal for forward looking merchants

The future proof choice where ever payments take you

In the rapidly evolving payments landscape, Lane5000 keeps all your options open with customization abilities like never before possible on a payment device. It utilizes the Nets omni channel transaction platform for seamless customer journeys.

Equipped with best in class hardware and technologies, it is able to combine alternative payments and engaging customized content into a single point of interaction.

Several integration alternatives

Lane5000 supports leading ECR systems, including cloud based setups. With a single integration you can install in the entire Nordic region with all currencies, languages, certifications and banks covered.
